Subject: Remedy of SCL West Bank Transformer and OA-11 Area
Boeing Plant 2, WAD 00925 6819
RCRA Docket #1092-01-22-3008(h)

Dear Messrs. Orlean & Blocker:

I am writing to advise you that Boeing is preparing a Focused Corrective Measure Study (FCMS) with the objective of removing PCB contamination associated with the Area of Discovery (AOD) release found next to the former Seattle City Light (SCL) Substation in the southwest corner of Plant 2. The area affected by the PCB release encompasses as well the area identified as Other Area 11.

The present status of the Plant 2 Corrective Action process would allow us to delay this remedy for quite some time, however, with the contaminant extent known through the investigation largely completed late last year, Boeing wishes to act on this remedy. We would like to complete this work by the end of 2006 for reasons of efficiency as construction redevelopment work occurs in the nearby 2-60s area.

In light of the proximity to the shoreline and the need to coordinate this objective with the Jorgensen parties, Seattle City Light, the City of Tukwila and others, we intend to prepare this FCMS for submittal in June. We look forward to working with you and the others on this important objective.

Sincerely,

Will Ernst
